55 Fleming Rd, Herston, Brisbane, QLD 4006

EDUCATION

Queensland University of Technology, Brisbane   *Feb. 2017 – Dec. 2018*
BIT. Computer Science, Minor: Intelligent Systems, CGPA: 6.50/7.00

Taylor's University, Subang Jaya   *Mar – Dec. 2016*
B. Software Engineering, CGPA: 3.87/4.00

WORK EXPERIENCE

Noshable, St. Lucia   *Jul. 2017 – present*
Software Engineer
- Currently developing a web application that allow users to find food products based on their allergies using Full Stack Symfony on a LAMP stack.
- Deployed the application to the web on Ubuntu AWS.

RedEye Apps, Brisbane   *Jun – Jul. 2017*
Winter Intern
- Refactored RedEye DMS front-end pages using Vue.js, broke the PHP back-end into models, controllers, and services, and wrote unit tests.
- Gained experience in reading and understanding messy code, and learning how a SaaS startup runs.

Teach For Malaysia (TFM), Kuala Lumpur   *Feb – Mar. 2016*
Web Developer (Volunteer)
- Devised a survey of TFM Fellows regarding their Initiatives
- Designed and developed a web application to view the projects using Google Spreadsheet API and JSON, allowing staff to easily find projects' information and data.

PROJECTS

Spheradical
Sphero, Node.js, Socket.io, Bootstrap
Real-time 2D drawing canvas using Sphero device

Medical Records Learner (academic)
Python, sklearn
Machine learning classifier able to predict types of tumour.

Noshable
Symfony, PHP, Doctrine, JavaScript, Bootstrap
Online platform where users can find food products based on their allergies or special diets.

Jiashengc.com
JavaScript, HTML, CSS, PHP, Bootstrap
Designed and coded my own personal website, hosted on a LAMP stack (ubuntu).
